Scheer IDS

Prof. Dr. August-Wilhelm Scheer Re-aligns Leadership of the Scheer Group

Christian Wachter will become CEO of Scheer IDS on January 1, 2027, and will take over group-wide coordination of Scheer IDS, Scheer IMC, and Scheer PAS. As long planned, Dr. Wolfram Jost is stepping down from executive management at his own request.

Saarbrücken, 13 November 2026

Prof. Dr. August-Wilhelm Scheer is realigning the leadership structure of the Scheer Group. The move sends a clear signal that the group will continue to evolve in the age of artificial intelligence.

“Our customers’ digital transformation keeps moving at high speed. The potential of artificial intelligence, in particular, calls for close interplay between process expertise, ERP software, upskilling, and organizational change. With Christian Wachter, we are laying the groundwork to connect the strengths of our companies even more closely and to offer our customers a joint, integrated portfolio,” explains Prof. Dr. August-Wilhelm Scheer.

Prof. Scheer also acknowledges the contributions of Dr. Wolfram Jost, who will leave his role as CEO of Scheer IDS at his own request on December 31, 2026: “Wolfram Jost has had a decisive influence on the development of the Scheer Group over many years. His spirit of innovation and his technological expertise have played a key role in the successful growth of our companies. I am very pleased that he will continue to support us with his experience.”

Dr. Wolfram Jost will remain closely associated with the Scheer Group. As Strategic Advisor, he will advise the companies on emerging topics, innovation, and technology questions.

As part of the realignment, Christian Wachter will join the executive management of Scheer IDS GmbH on January 1, 2027, succeeding Dr. Wolfram Jost as Chief Executive Officer (CEO).

Christian Wachter will take on the CEO role at all three companies: Scheer IDS (an SAP consulting firm with proven expertise in business process management), Scheer IMC (a software platform for innovative learning technologies and learning experience solutions), and Scheer PAS (a platform for developing AI agents). This brings coordination under a single leader. The new organizational structure is designed to strengthen collaboration between the companies, make full use of synergies, and accelerate the growth of the Scheer Group.

At the same time, key responsibilities within Scheer IDS are being reorganized: Kriszta Ohla will take overall responsibility for the delivery of all customer projects. Dr. Guido Ehmer will focus on further building and expanding public sector sales, while Oliver Hafner takes over responsibility for private sector sales. With these changes, Scheer IDS strengthens its market approach and creates clear responsibilities for further scaling its operations.

The Scheer Group companies share a common goal: supporting customers holistically as they shape their AI transformation. By closely combining expertise in process management, intelligent automation, learning, change management, and enterprise software, they create an integrated portfolio for transforming businesses in the AI era.

Christian Wachter sees these closer ties between the companies as a key success factor: “Our customers face the challenge of turning the potential of AI into concrete business results. With the combined expertise of Scheer IDS, Scheer IMC, and Scheer PAS, we can support them along the entire value chain: from strategy, processes, and technology to learning and change. Closer collaboration between our companies creates the best foundation for this.”

With its new leadership structure, the Scheer Group underscores its ambition to be one of Europe’s leading partners for AI-driven business and process transformation.
